EXPERIENCES

Product Designer — Finvity, Brazil

12.2025 - Present

- I work on the wealth and succession management platform, responsible for structuring complex flows, dashboards, and financial simulations, transforming data into actionable insights for decision-making by users who are lawyers, financial advisors, and multi-family offices.
- I collaborate closely with engineering to define scalable solutions, contributing to operational efficiency, consistency, and product evolution.

Product Designer — miio, Portugal

03.2025 - 12.2025

- I reduced onboarding time by 31% by mapping critical friction points and restructuring the initial flow based on data, benchmarks, and testing.
- I designed a feature for direct connection with the vehicle, validated by over 2,000 users in beta, with ratings between 4 and 5 stars.
- I also contributed to the evolution of the Design System (tokens, components, and documentation).

Product Designer — Levva, Brazil

05.2024 - 03.2025

- I worked on the redesign of a health platform (EMS), focusing on conversion, retention, and clarity of experience.
- I conducted interviews with doctors, performed international benchmarking, and analyzed metrics to guide strategic product decisions.

Product Designer — Tembici, Brazil

06.2022 - 02.2024

- I worked on B2C and B2B2C products, focusing on mobile apps, hardware, and internal products.
- I was responsible for a new product, directly contributing to eliminating a loss of \$1M/month by repositioning delivery personnel and improving the experience.

UX Designer — smarters, Brazil

09.2020 - 05.2022

- I structured complete chatbot flows, including onboarding and lead capture. In one of the products, we reached 3 million users and an 82% registration conversion rate.
- I also designed a ticket management system for dealerships, structured as a white-label SaaS product with its own Design System.

SKILLS

Product Design

Data-driven design, User research, Design system, Growth Design, UI Design, UX Design, A/B Testing

Strategy

Journey mapping, Data analysis, Facilitation dynamics

Development & Data analysis

HTML/CSS, Javascript, Amplitude, Google Analytics, Clarity, Mixpanel, Hotjar

LANGUAGES

Portuguese – Fluent

English – Advanced (C1)

EDUCATION

Advanced Design System

Escãla, Brazil

UX Design

Google, Brazil

UX/UI Design

Alura, Brazil

Product Design

Mauá Institute of Technology, Brazil
