SUMMARY

Senior Product Designer with 13 years in design, 6 of them in product, across fintech, retail, mobility and health (B2B, B2C and B2B2C). I work from discovery to delivery on SaaS and mobile products, using research, data and Design Systems. Results include ~R$1M/month saved at Tembici and 60% fewer support questions at Finvity.

SKILLS

Advanced: Figma, Product Discovery, User Research (interviews, usability testing), Heuristic Evaluation, Prototyping, Interaction Design, Information Architecture, Design Systems (tokens, components, documentation), Complex Flows & Dashboards (B2B SaaS), Data-informed Design, A/B Testing, Journey Mapping, Workshop Facilitation

Intermediate: Product Strategy, Service Design, Data Visualization, Conversion Optimization, Product Analytics (Amplitude, Mixpanel, Google Analytics, Hotjar, Clarity), Conversational Design, Stakeholder Management, Accessibility (WCAG), Jira, AI Prototyping (Claude, Google Stitch, Figma Make)

Beginner: JavaScript, HTML/CSS

PROFESSIONAL EXPERIENCE

Senior Product Designer

Renner, Brasil — 05/2026 to Present

Core Responsibilities:

- Mapped pain points across every stage of the affiliate program (12,000+ registered) by leading discovery with quantitative and qualitative research and journey mapping, which grounded a new product proposal.
- Validated the new affiliate management proposal with stakeholders and redesigned the program’s landing page, focused on showing affiliates their own performance.
- Cut email-change requests to customer service by 80% by contributing to MFA login and facial-biometrics account recovery on a platform with 5M+ monthly logins (app and web).

Senior Product Designer

Finvity, Brasil — 12/2025 to 05/2026

Core Responsibilities:

- Reduced support questions by 60%, including from the largest client, one of Brazil’s biggest banks, by restructuring client onboarding as the foundation of every analysis (with income tax import) and redesigning flows, dashboards and simulations in 4 months.
- Found 11 usability problems, 7 severe or catastrophic, through a Nielsen heuristic evaluation and an international benchmark, which set the redesign’s priority order.

Product Designer

miio, Portugal 03/2025 to 12/2025

Core Responsibilities:

- Validated the subscription plan with 2,000 users in an A/B beta (rated 4 to 5 stars) after arguing, with the design lead, for offering the plan inside the app's normal use instead of the CEO's proposed paywall.
- Designed the direct vehicle connection (battery, consumption and real-time cost) and the full subscription lifecycle: trial, payment, failures, renewal, cancellation and checkout discount.
- Cut sign-up journey time by 31% by restructuring onboarding based on data and benchmarks, measured in an A/B test in Google Analytics.

Product Designer

Levva, Brasil 05/2024 to 03/2025

Core Responsibilities:

- Increased average time on EMS's health platform by 400% by redesigning journeys, interfaces and information architecture based on interviews with doctors and metrics analysis.
- Prioritized improvements with Product, Engineering and stakeholders and adapted the Design System to the new interface.

Product Designer

Tembici, Brasil 06/2022 to 02/2024

Core Responsibilities:

- Enabled ~R$1M/month in operating savings and breakeven in ~10 months by running the research (50+ survey responses, 9 interviews) and the cross-functional workshop that split iFood delivery riders from the shared fleet.
- Designed, as the sole Product Designer, the end-to-end Bike pra Você journey in the iFood Pedal app, validated with a manual MVP and usability tests; under the new model, fleet maintenance issues dropped 72%.

EDUCATION

Product Design

Instituto Mauá de Tecnologia

CERTIFICATES / COURSES

UX Design, Google, Brasil

UX/UI Design, Alura, Brasil

Advanced Design System, Escåla, Brasil
