SUMMARY

Senior Product Designer with 6+ years of experience in B2B, B2C and B2B2C digital products across fintech, retail, mobility and health. I work from discovery to delivery on SaaS, mobile and data-driven products, focusing on complex flows, dashboards and Design Systems.

SKILLS

Advanced: Figma, Product Discovery, User Research (interviews, usability testing), Prototyping, Interaction Design, Information Architecture, Design Systems (tokens, components, documentation), Complex Flows & Dashboards (B2B SaaS), Data-informed Design, A/B Testing, Journey Mapping, Workshop Facilitation

Intermediate: Data Visualization, Conversion & Growth Design, Product Analytics (Amplitude, Mixpanel, Google Analytics, Hotjar, Clarity), Conversational Design, Stakeholder Management, Accessibility (WCAG), Jira, AI Prototyping (Figma Make/Cursor)

Beginner: JavaScript, Design Critique, HTML/CSS

PROFESSIONAL EXPERIENCE

Senior Product Designer

Renner, Brasil — 05/2026 to Present

Core Responsibilities:

- Lead discovery for the affiliate program (12,000+ registered affiliates): quantitative and qualitative research, desk research and journey mapping with the internal team, uncovering pain points across every stage of the program.
- Redesigned the program’s landing page and validated a new product proposal for affiliate management with stakeholders, focused on giving affiliates more visibility and enabling business expansion.
- Contributed to MFA login and facial-biometrics account recovery on a platform with 5M+ monthly logins (app and web), reducing email-change requests to customer support by 80%.

Senior Product Designer

Finvity, Brasil — 12/2025 to 05/2026

Core Responsibilities:

- I work on the wealth and succession management platform, being responsible for structuring complex flows, dashboards and financial simulations, transforming data into actionable insights for decision-making by users who are lawyers, financial advisors and multi-family offices.
- I work closely with engineering in defining scalable solutions, contributing to operational efficiency, consistency and product evolution.

Product Designer

miio, Portugal 03/2025 to 12/2025

Core Responsibilities:

- Reduced onboarding time by 31% by mapping critical frictions and restructuring the initial flow based on data, benchmark and tests.
- Designed a direct vehicle connection feature, validated by +2,000 users in beta phase, with a rating between 4 and 5 stars.
- I also worked on the evolution of the Design System (tokens, components and documentation).

Product Designer

Levva, Brasil 05/2024 to 03/2025

Core Responsibilities:

- I worked on the redesign of a health platform (EMS), focusing on conversion, retention and clarity of experience.
- I conducted interviews with doctors, international benchmarks and metric analysis to guide strategic product decisions.

Product Designer

Tembici, Brasil 06/2022 to 02/2024

Core Responsibilities:

- I worked on B2C and B2B2C products, working on mobile app, hardware and internal products.
- I was responsible for a new product, directly contributing to eliminating a loss of R$1M/month, by repositioning delivery people and improving the experience.
